

improving initial estimate

Andrew Glover

2023-10-24

We will make a couple of assumptions:

1. Athletic performance is completely determined by Banister's FF model
2. p_0 is exact and we don't have to estimate it
3. There is no noise in estimating the parameters or performance

The goal of this document is to try to get a good initial estimate for the parameters for our new algorithm and for RLS.
